

WORKSHEET OUTPOST | Grade 2 Math

Explain a shape-sharing pattern

OW-G2-080 | Five questions

Success criteria

I can count the rows and columns to find the total number of squares.

Name: _____ Date: _____

Read each problem or listen as someone reads it. Show your thinking with objects, pictures, words, or numbers.

1. Draw a rectangle with 2 rows and 3 columns of equal squares. How many squares are there? Describe a pattern you see.

2. Draw a rectangle with 3 rows and 3 columns of equal squares. How many squares are there? Describe a pattern you see.

3. Draw a rectangle with 4 rows and 3 columns of equal squares. How many squares are there? Describe a pattern you see.

4. Draw a rectangle with 5 rows and 3 columns of equal squares. How many squares are there? Describe a pattern you see.

5. Draw a shape like one on this page. Name it and describe one thing you notice about it.

You can point, speak, draw, or write. Adults can note any help they give.
