

WORKSHEET OUTPOST | Grade 1 Math

Pick a tool for comparing length

OW-G1-112 | Five questions

Success criteria
I can measure from end to end using equal units with no gaps.

Name: _____ Date: _____

Read each problem or listen as someone reads it. Show your thinking with objects, pictures, words, or numbers.

1. To measure a desk, should you use equal cubes or different-size blocks? Explain.

2. Someone leaves gaps between the cubes when measuring. Explain how to fix this.

3. Someone overlaps the squares when measuring a length. Will the measurement be accurate? Why?

4. Which helps compare two ribbons: matching their starting ends or folding both? Explain.

5. Write a problem like question 1 with new numbers or objects. Solve it and show your work.

You can point, speak, draw, or write. Adults can note any help they give.
