

WORKSHEET OUTPOST | Kindergarten Math

Extra practice: flat faces and solid objects

OW-K-142 | Five questions

Success criteria
I can tell how two shapes are alike and different.

Name: _____ Date: _____

Read each problem or listen as someone reads it. Show your thinking with objects, pictures, words, or numbers.

1. A cube has flat faces. What shape is each face?

2. A cylinder has 2 flat faces. What shape are they?

3. Is a circle the same as a sphere? Explain.

4. Name a solid with a circular base and a point.

5. Write a problem like question 1 with new numbers or objects. Solve it and show your work.

You can point, speak, draw, or write. Adults can note any help they give.
